

## Open House arrangement at FLUX A/S.

Asnaes, Denmark September 2008

Culture Night arrangement in Asnæs City – 19. September 2008.

FLUX had prepared to open up for visitors – as a part of the Culture Night arrangement – and it was a great success.

Around 50 people was visiting our company. It was necessary to split the presentation up in 2 groups, where one group got a presentation of our activities in the meeting room, while the other group had a facility tour.

Both our Industrial on Magnetics Components and Power Supplies activities – as well as our Space activities was explained and samples of the products was shown and the final projects using our products - was explained as well.

Due to the fact, that the main part of our Industrial production facilities is situated in Thailand – and our facilities in our site in Asnæs are mainly Sales-, Engineering, Administration – the facility tour was covered mainly of the Space production. Here the main part of the manufacturing is done under microscope and in some very clean and controlled environmental conditions. Some part of the area is a Clean Room Class 100.000.
