

Flux is targeted for new orders within the Renewable Energy segment

Asnaes, Denmark May 2010

Flux is targeted the Renewable Energy segment for new orders.

Wind Energy, Solar Energy and Wave Energy will for the coming years be a absolute focus area for Flux.

Flux see a great market for our customised product for Forward inverters, Boost inverters, Choke-packets.

Our approach to and experience working with alternative materials gives our customers significant price advantage.

The benefit for our customers are also:

- Time to market
- Reliable product for long life time
- Supply Change Management
